

YES!!! I support XM Radio and other satellite radio providers and their right to provide everything that AM/FM radio stations and TV stations can provide. I have been a subscriber to XM for 2 years and have not listened to Atlanta radio since. Why? The programs talk too much, the commercials are repetitive, the music is too limited, and they just keep getting worse. XM is the best thing to happen to radio and if they want to provide traffic information in Atlanta - they have a big job ahead of them, but they have my support!! Petition 04-160 must be quashed!!
